Hi Bill,

Thanks, for the reply. My reference was to Michael Sivak and the 15th is fine for the QAPP review.

Thanks,

Tanya

Tanya,

When you say Michael, I take it that you are referring to Adly Michael. He is the RSCC for us. Also for the QAPP review can I provide you with comments around the 15th of dec?

Subject: Rolling Knolls

Hi Amy,

Please have CDM contact the CLP representative to determine the minimum volume that can be provided for VOCs, and TAL metals plus cyanide for the pore water samples. It appears that spilt samples were provided but, CDM is concerned that there is not going to be enough volume. Please review the QAPP volumes and the response from the CLP representative to determine if there will be enough volume for the VOCs and metals.

If you have any questions please contact Michael.

Thanks,

Tanya
